

## Advanced Query > Tariff and Trade Analysis

The Advanced Query – Tariff and Trade Analysis tool lets you access data on multiple tariff types and rates from UNCTAD and WTO databases.

You can use this tool to create sophisticated queries involving multiple reporters, partners, products and years.

To construct a query, start by entering a Query Name and Description.

Select TRAINS or WTO-IDB as your Data Source, then click “Proceed”

For Reporters, you can select one or more countries from the Country List, or you can select from predefined and custom Country Groups.

Tick this option if you want a detailed breakdown of the selected Country Group in your report.

For Products, you can use the Product Search box or select your products manually.

To do a manual search, select the Nomenclature then proceed with selecting the products using these available options.

You can select multiple products from different categories and tiers up to the 6-digit level.

You can also select from standard or custom product groups.

Tick this option if you want a detailed breakdown of the selected Product Group in your report.

You can select “Partners” the same way you did with your Reporters.

For “Years”, you can select one or more years, or you can opt to show the Latest Available year for each country.

For “Tariffs”, you can select one or more duty types.

Click on this option if you wish to include Ad Valorem Equivalent in your report.

If your report contains multiple reporters and years, click on “Adjust Years & Submit”.

This will show you the countries that are missing data and provide you with a list of available years of data for each country.

Click on a country and year if you wish to make individual changes

or you can click on the dropdown menu and select an option for replacing all the empty years.

Click “Proceed” when you are ready to submit your query.

You will be redirected to the Download and View Results page where you can see the progress of your query.

Note that your report may take some time to be completed, depending on the size of your query.

To check on your report, you can either refresh your browser or click on the “refresh” icon.

When your report is available, click on the “View” icon to open it.

In the Report Columns Selection window, you can choose which attributes to include or omit from your report.

A short description will be shown when you highlight a variable.

Click “Proceed” when you have finalized your selections.

In the Result View window, you will find a detailed breakdown of your report.

You can refer to the WITS online Help document for more information on the variables in your report.

To download your report, simply click on the download icon.

Select the File Format, select the attributes you want to include in your report, and then click “Download” when you are done.

Click on the “save” icon to download the report to your personal drive.

A copy of your query will also be saved in the system, allowing you to access and modify your report for future use.

Thank you for watching.
