

Quick Search – UN Comtrade by Country/Period

Performing a query using "UN COMTRADE By Country/Period" allows you to access trade values and quantities for all traded products for one reporter country, one year, and one or all partners.
In this example, we will determine Belgium's top 10 exports worldwide, as well as its top 5 exports to Canada for the year 2014.
You can select a single Nomenclature, Tier, Year, and Flow.
Select Belgium as your Reporter, then World as your Partner. This will give you the total value of exports for each of Belgium's products.
Click on "View Report" when you are done selecting your variables.
In the Report Columns Selection window you can choose which attributes to include or omit from your report.
When you are finished, click "Proceed"
In the Result View window you can see Belgium's exports are listed in numerical order by Product Code.
To arrange the products by value, click on the TradeValue column header.
You now have Belgium's top 10 exports worldwide.
To determine Belgium's top 5 exports to Canada for the same year, simply change the Partner name, then click "View Report"
Select the attributes you want to display, then click "Proceed" when you are done.
Again, click on the TradeValue column header to sort the products by value.
You now have Belgium's top 5 exports to Canada for the year 2014.
If you wish to save your report, click on "Download"
Enter a Job Name and Description, and select the format in which to save your file
Check the status of your report in the Download and View Results page.
When your report is ready, you can save it in your personal drive.
