

Quick Search by Product

You can use WITS to conduct simple queries efficiently by scrolling to the “Quick Search” tab.
Select “UN COMTRADE By Product” to search for trade values and quantities for a single product or product category.
In this example, we will determine Japan’s top five trading partners in exporting motor vehicles.
Select the Nomenclature, Year, Flow, Tier, and Product.
Select Japan as your Reporter, then select all countries as the Trading Partners.
Click on “View Report” when you have finished selecting your variables.
In the Report Columns Selection window you can choose which attributes to include or omit from your report.
When you are ready, click “Proceed”
In the Result View window you can see Japan’s trading partners are listed alphabetically.
To rank the trading partners, click on the TradeValue column header.
You now have the information you need.
