## **ANNEX 4.03**

### **SPECIFIC RULES OF ORIGIN**

#### **Section A**

#### **General Interpretative Note**

1. A requirement of a change in tariff classification applies only to non-originating materials.

2. When a specific rule of origin is defined with the criterion of change of tariff classification, and in its content the tariff code at chapter, heading or subheading levels of the harmonized system are excluded, each Party shall interpret that the materials corresponding to those tariff codes have to be originating so that the good can be qualified as originating.

3. Where a tariff heading or subheading is subject to optional specific rules of origin, origin shall be conferred if a good satisfies one of them.

4. When a single rule of origin is applicable to a group of headings or subheadings and that rule of origin specifies a change of heading or subheading, each Party shall interpret the rule that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading “outside that group”, each Party shall interpret the rule to require that the change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.

5. The following definitions apply:

section means a section of the Harmonized System;

chapter means a chapter of the Harmonized System;

heading means the first four digits in the tariff classification number under the Harmonized System; and,

subheading means the first six digits in the tariff classification number under the Harmonized System.
